Qualified Clinical Data Registry

Vituity has created a Qualified Clinical Data Registry (QCDR) program that submits quality data to CMS on behalf of Vituity's Emergency Medicine, Urgent Care, Hospital Medicine, Critical Care Medicine, and Post-Acute Care providers. The QCDR includes CMS-approved measures (both MIPS and non-MIPS measures) that are measurable, actionable, and relevant to our practice lines. The QCDR collects and validates quality data via Vituity Revenue Cycle Management and improves Vituity performance through "real-time" provider feedback and focused provider education.

A Multi-Disciplinary Approach

Our QCDR team continually refines data processes and strategies to improve provider and site quality performance and adapt to complex CMS mandates and guidelines.

Program Benefits

- **Meet CMS Requirements**: The QCDR program submits quality data on behalf of Vituity partners to CMS annually to meet CMS requirements (formerly PQRS, now MIPS) – No other CMS quality data reporting (e.g., ACEP's CEDR) required!
- **Multi-level Reporting**: User-friendly dashboard reports for individual providers as well as site and region-level reports for medical directors, QI directors and regional directors
- **Benchmarking**: National CMS benchmarks for PQRS/MIPS measures and risk-adjusted benchmarks for outcome measures

Our QCDRs

With our QCDRs we are able to respond quickly to the change quality data needs of our patients, providers, clients and hospital partners.

E-CPR
(Emergency Clinical Performance Registry)

H-CPR
(Hospitalist Clinical Performance Registry)

We Support...

Over **2500** eligible professionals for the QCDR (MD/DO, PA/NP)

Over **100** covered sites in 10 states under Vituity

Nearly **6 million** patients in 2017

Vituity is a nationwide, multispecialty partnership of top physicians, advanced providers, and industry professionals. Providing a wide range of acute integrated care, Vituity proactively leads positive change in the business and practices of healthcare. Vituity's footprint continues to rapidly expand as it partners with and supports hospitals, health systems, clinics, payers, and employers.
